DATA SHEET

vibro-meter®

TQ403, EA403 and IQS900 proximity measurement system

TQ403

IQS900

KEY FEATURES AND BENEFITS

- From the vibro-meter® product line
- Non-contact measurement system based on eddy-current principle
- Ex certified versions for use in hazardous areas (potentially explosive atmospheres)
- Conforms to API 670 recommendations
- 5 and 10 m systems
- Temperature-compensated design
- Voltage or current output with protection against short circuits
- Frequency response:
  DC to 20 kHz (−3 dB)
- Measurement range:
  12 mm
- Temperature range:
  −40 to +180 °C

APPLICATIONS

- Shaft relative vibration and gap/position measurement chains for machinery protection and/or condition monitoring
- Ideal for use with VM600^{Mk2}/VM600 and VibroSmart® machinery monitoring systems

DESCRIPTION

The TQ403, EA403 and IQS900 form a proximity measurement system from Meggitt's vibro-meter® product line. This proximity measurement system allows contactless measurement of the relative displacement of moving machine elements.

TQ4xx-based proximity measurement systems are particularly suitable for measuring the relative vibration and axial position of rotating machine shafts, such as those found in steam, gas and hydraulic turbines, as well as in alternators, turbo-compressors and pumps.

Meggitt SA, Route de Moncor 4, Case postale, 1701 Fribourg, Switzerland

www.meggitt.com

DESCRIPTION *(continued)*

The system is based around a TQ403 non-contact sensor and an IQS900 signal conditioner. Together, these form a calibrated proximity measurement system in which each component is interchangeable. The system outputs a voltage or a current proportional to the distance between the transducer tip and the target, such as a machine shaft.

The active part of the transducer is a coil of wire that is moulded inside the tip of the device, made of Torlon® (polyamide-imide). The transducer body is made of stainless steel. The target material must, in all cases, be metallic.

The transducer body is available only with metric thread. The TQ403 has an integral coaxial cable, terminated with a self-locking miniature coaxial connector. Various cable lengths (integral and extension) can be ordered.

The IQS900 signal conditioner contains a high-frequency modulator/demodulator that supplies a driving signal to the transducer. This generates the necessary electromagnetic field used to measure the gap. The conditioner circuitry is made of high-quality components and is mounted in a painted aluminium housing.

Note: The IQS900 signal conditioner matches or betters the outstanding measurement performance and specifications of the IQS450 signal conditioner, which it replaces. Accordingly, the IQS900 is compatible with all TQ9xx and TQ4xx proximity sensors / measurement chains.

In addition, the IQS900 signal conditioner includes improvements such as: SIL 2 "by design", improved frame-voltage immunity, improved electromagnetic immunity and emissions, smaller output impedance (voltage output), optional diagnostic circuitry (that is, built-in self-test (BIST)), raw output pin, test input pin, new DIN-rail mounting adaptor and removable screw-terminal connectors for easier installation.

The TQ403 transducer can be matched with a single EA403 extension cable to effectively lengthen the front-end. Optional housings, junction boxes and interconnection protectors are available for the mechanical and environmental protection of the connection between the integral and extension cables.

TQ4xx-based proximity measurement systems can be powered by associated machinery monitoring systems such as VM600^{Mk2}/VM600 modules (cards) or VibroSmart® modules, or by another power supply.

For specific applications, contact your local Meggitt representative.

SPECIFICATIONS

Overall proximity measurement system

Operation

Sensitivity	
• Ordering option B31	: 1.33 mV/µm (34 mV/mil)
• Ordering option B32	: 0.417 µA/µm (10.6 µA/mil)
Linear measurement range (typical)	
• Ordering option B31	: 0.75 to 12.75 mm, corresponding to a −1.6 to −17.6 V output
• Ordering option B32	: 0.75 to 12.75 mm, corresponding to a −15.5 to −20.5 mA output
Linearity	: See **Performance curves on page 8**
Frequency response	: DC to 20 kHz (−3 dB)
Interchangeability of elements	: All components in system are interchangeable

Approvals

Conformity	: European Union (EU) declaration of conformity (CE marking). EAC marking, Eurasian Customs Union (EACU) certificate/ declaration of conformity.
Electromagnetic compatibility	
• TQ403 and EA403	: EN 61000-6-2:2005. EN 61000-6-4:2007 + A1:2011. TR CU 020/2011.
• IQS900	: EN 61000-6-2:2005. EN 61000-6-4:2007 + A1:2011. EN 61326-1:2013. EN 61326-3-2:2008 (SIL).
Electrical safety	: EN 61010-1:2010
Environmental management	: RoHS compliant (2011/65/EU)
Hazardous areas	: Ex approved versions (see **Potentially explosive atmospheres starting on page 3**)
Russian federal agency for technical regulation and metrology (Rosstandart)	: Pattern approval certificate No 60859-15

SPECIFICATIONS *(continued)*

System calibration

Calibration temperature	: +23°C ±5°C
Target material	: VCL 140 steel (1.7225)

Note: For applications using a non-standard or special target material, performance curves can be generated and supplied. Contact Meggitt SA for further information.

Total system length

The total system length (TSL) is the sum of the length of the TQ4xx transducer's integral cable and the length of the EA40x extension cable. The supported TSLs can be obtained from different combinations of cables.

Total system lengths

- 5 m : 1.0 m integral cable + 4.0 m extension cable.
  5.0 m integral cable with no extension cable.
- 10 m : 1.0 m integral cable + 9.0 m extension cable.
  5.0 m integral cable + 5.0 m extension cable.
  10.0 m integral cable with no extension cable.

Note: The combination of cables selected for a particular total system length depends on the application. For example, to obtain the optimum location for the separation between the integral and extension cables or to eliminate the requirement for an extension cable.

Total system length trimming

Due to the characteristics of the coaxial cable, an "electrical trimming" of the nominal length of extension cables is necessary to optimize the system performance and the transducer interchangeability.

TSL for a 5 m measurement chain	: 4.4 m minimum
TSL for a 10 m measurement chain	: 8.8 m minimum

Equivalent materials:	A 37.11 (1.0065), AFNOR 40 CD4, AISI 4140

SPECIFICATIONS *(continued)*

TQ403 proximity transducer and EA403 extension cable

General

Transducer input requirements	: High-frequency power source from an IQS900 signal conditioner

Environmental

Temperature ranges	
• Transducer	: −40 to +180°C with drift <5% (operating). +180 to +220°C with drift >5% (short-term survival).
• Transducer and cable	: **−40 to +195°C if used in an Ex Zone**
• Cable, connector and optional protection	: −40 to +200°C
Protection rating (according to IEC 60529)	: The head of the proximity transducer (transducer tip and integral cable) is rated IP68
Vibration (according to IEC 60068-2-26)	: 5 g peak between 10 and 500 Hz
Shock acceleration (according to IEC 60068-2-27)	: 15 g peak (half sine-wave, 11 ms duration)

Physical characteristics

Transducer construction	: Wire coil Ø18 mm, Torlon (polyamide-imide) tip, encapsulated in MAZ (1.4305) stainless steel body with high-temperature epoxy glue
Integral and extension cables	: FEP covered 70 Ω coaxial cable, Ø3.6 mm
Connectors	: Self-locking miniature coaxial connectors. Note: When connecting, these should be hand-tightened until locked.
Optional protection	
• Flexible stainless steel hose (protection tube)	: The stainless steel hose provides additional mechanical protection but is not leak-tight
• FEP sheath (extruded fluorinated ethylene propylene)	: The FEP sheath provides resistance to almost all chemicals and low permeability to liquids, gases and moisture. It is also flexible, low friction and mechanically tough.

SPECIFICATIONS *(continued)*

IQS900 signal conditioner

Current output (2-wire signal transmission)

Current at min. / max. gap	: −15.5 mA / −20.5 mA
Measurement range	: 5 mA (corresponding to 12 mm)
Output sensitivity	: See **Operation on page 2** and **IQS900 signal conditioner on page 15**
Nominal output signal	
• Without diagnostics	: −15.5 to −20.5 mA
• With diagnostics	: −15.5 to −20.5 mA indicates normal operation. Other current values (>−15.5 or <−20.5 mA) indicate a problem with the measurement chain (sensor, cabling and/or signal conditioner).
Output impedance	: >60 kΩ. Note: Recommended monitoring system input impedance: ≤350 Ω.

Voltage output (3-wire signal transmission)

Voltage at min. / max. gap	: −1.6 V / −17.6 V
Measurement range	: 16 V (corresponding to 12 mm)
Output sensitivity	: See **Operation on page 2** and **IQS900 signal conditioner on page 15**
Nominal output signal	
• Without diagnostics	: −1.6 t o −17.6 V
• With diagnostics	: −1.6 t o −17.6 V indicates normal operation. Other current values (>−1.6 or <−17.6 V) indicate a problem with the measurement chain (sensor, cabling and/or signal conditioner).
Output impedance (small signal)	: <100 Ω at DC. <300 Ω at 20 kHz. Note: Recommended monitoring system input impedance: ≥50 kΩ. The low output impedance enables operation with a wider range of galvanic separation units / safety barriers, without loss of performance. For example, an IQS900 (output impedance 100 Ω) connected to a third-party galvanic isolator (input impedance 10 kΩ) will see 1% max. signal loss due to impedance matching.
Protection	: Short-circuit (35 mA), overvoltage (−33 V_{DC} typical)
Output voltage swing	: −0.05 to −22.5 V with a 50 kΩ load and a −24 V_{DC} power supply. −0.05 to −21.5 V with a 10 kΩ load and a −24 V_{DC} power supply.

Raw output (RAW/COM)

Output voltage range	: −0.8 to −8.8 V (nominal)
Output impedance	: <15 kΩ up to 20 kHz. <10 kΩ for DC measurement. Note: Recommended test equipment input impedance: >1 MΩ.
Protection	: Short-circuit, overvoltage (−33 V_{DC} typical)

Test input (TEST/COM)

Input voltage range	: ±0.1 to 4.0 V_{PK-PK} (nominal), depending on the measured gap (DC)
Input impedance	: 500 kΩ. Note: Recommended test equipment output impedance: >5 kΩ.
Protection	: Overvoltage (−33 V_{DC} typical)

SPECIFICATIONS *(continued)*

Power supply (to IQS900)

Input voltage range

• With a current output signal (2-wire signal transmission)	: −18 to −30 V_{DC} (nominal)
• With a voltage output signal (3-wire signal transmission)	: −19 to −30 V_{DC} (nominal)
Current consumption (with nominal 24 V_{DC} supply)	: 25 mA max.
Overvoltage protection (diode)	: −33 V_{DC} typical

Note: The IQS900 should be powered (energised) using a limited-power, low-voltage power supply such as a sensor power supply output provided a VM600^{Mk2}/VM600 or VibroSmart® monitoring and/or protection system, a GSI127 galvanic separation unit or other suitable power supply.
In safety-related applications, an IQS900 must be powered using a limited-power, low-voltage power supply with a safe limitation of −30 V_{DC} (nominal), even in the event of a single fault with the power supply.

Environmental

Temperature

• Operating and storage	: −40 to 85°C (−40 to 185°F)
Humidity	: 0 to 95%, non-condensing
Protection rating (according to IEC 60529)	: IP20. Note: The IQS900 is suitable for indoor use only unless it is installed in an industrial housing or enclosure that ensures a higher level of environmental protection.
Flammability	: UL94 V-0
Vibration (according to IEC 60068-2-6)	: 5 g peak between 10 and 500 Hz
Shock acceleration (according to IEC 60068-2-27)	: 15 g peak (half sine-wave, 11 ms duration)

Connectors

Self-locking miniature coaxial connector (bidirectional)	: 1 contact for sensor-side signal: sensor (connects to TQ9xx sensor or EA902 cable)
Screw-terminal connector (input)	: 4 contacts for test signals: raw output (RAW/COM) and test input (TEST/COM)
Screw-terminal connector (output)	: 4 contacts for monitor-side signals: measurement output (O/P/COM) and power supply input (−24V/COM)

Screw-terminal connectors

• Clamping range (min. to max.)	: 0.2 to 1.5 mm^2 (24 to 16 AWG)
• Tightening torque (min. to max.)	: 0.2 to 0.25 N•m (0.15 to 0.18 lb-ft)

Note: The IQS900 features removal screw-terminal connectors that can unplugged from the main body of its housing to simplify installation and mounting.

SPECIFICATIONS *(continued)*

Physical characteristics

Electrical connections	: Self-locking miniature coaxial connector and removable screw-terminal connectors (see **Connectors on page 11**)
Housing material	: Injection-moulded aluminium, painted
Dimensions	: See **Mechanical drawings and ordering information on page 15**
Weight	: 200 g (0.44 lb) approx.
Mounting	
• Without DIN-rail mounting adaptor	: Two M4 screws
• With DIN-rail mounting adaptor (ordering option code G2)	: MA130 DIN-rail mounting adaptor for IPC707 and IQS900 signal conditioners. Suitable for TH 35 DIN rails (according to EN 50022 / IEC 60715). For example, TH 35-7.5 or TH 35-15. See **Accessories on page 16**.

MECHANICAL DRAWINGS AND ORDERING INFORMATION *(continued)*

IQS900 signal conditioner *(continued)*

Notes

1. Ordering option code **A5** ("Ex") specifies an IQS900 signal conditioner suitable for use for use in hazardous areas.
• For an IQS900 signal conditioner with protection mode "Ex" located in an Ex Zone 2, the user must ensure that the IQS900 is installed in an industrial housing or enclosure that ensures a protection rating of at least IP54 (or equivalent).

2. Ordering option code **C** specifies an IQS900 signal conditioner either without diagnostics (**C1**) or with diagnostics (**C2**):
• An IQS900 signal conditioner without diagnostics (**C1**) is similar to the IQS45x, which it replaces. The IQS900 is a form, fit and functionally equivalent replacement that matches or betters the measurement specifications of the IQS45x.
• An IQS900 signal conditioner with diagnostics (**C2**) includes optional diagnostic circuitry that automatically detects and remotely indicates problems with the measurement chain (sensor, cabling and/or the IQS900 itself). An IQS900 with diagnostics is certified SIL 2 (IEC 61508) and PL c Cat 1 (ISO 13849) "by design" to more easily meet the requirements of safety-related applications.

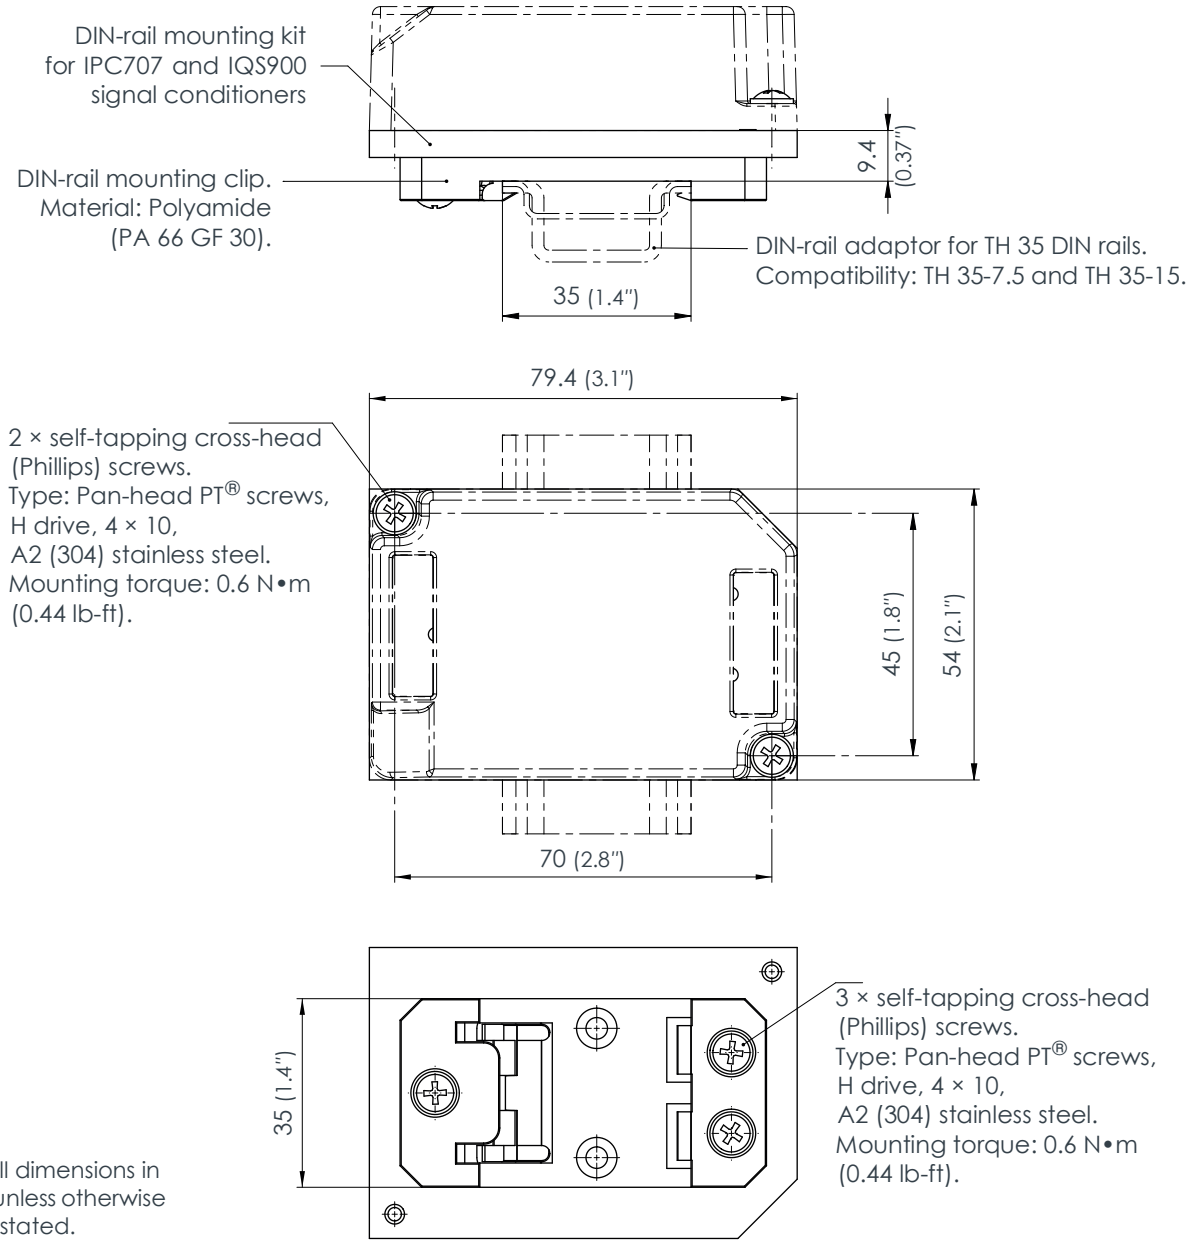
ACCESSORIES

ABA17x	Industrial housings	: Refer to corresponding data sheets
IP172	Interconnection protection	: Refer to corresponding data sheet
JB118	Junction box	: Refer to corresponding data sheet
KS107	Flexible conduit (protection tube)	: Refer to corresponding data sheet
MA130	Mounting adaptor	: See below
SG1xx	Cable feedthroughs	: Refer to corresponding data sheets

ACCESSORIES *(continued)*

MA130 DIN-rail mounting adaptor



Note: All dimensions in mm (in) unless otherwise stated.

Ordering number (PNR): 809-130-000-021

RELATED PRODUCTS

TQ401, EA401 and IQS450	Proximity measurement system (2 mm measurement range)	: Refer to corresponding data sheet
TQ402/TQ412, EA402 and IQS450	Proximity measurement system (2 or 4 mm measurement range)	: Refer to corresponding data sheet
TQ422/TQ432, EA402 and IQS450	Proximity measurement system (2 or 4 mm measurement range, high-pressure applications)	: Refer to corresponding data sheet
TQ423, EA403 and IQS450	Proximity measurement system (12 mm measurement range, high-pressure applications)	: Refer to corresponding data sheet
TQ442, EA402 and IQS450	Proximity measurement system (2 or 4 mm measurement range, right-angle (90°) mount)	: Refer to corresponding data sheet
TQ902/TQ912, EA902 and IQS900	Proximity measurement chains (2 or 4 mm measurement range)	: Refer to corresponding data sheet
TQ922/TQ932, EA902 and IQS900	Proximity measurement chains (2 or 4 mm measurement range, high-pressure applications)	: Refer to corresponding data sheet
TQ942, EA902 and IQS900	Proximity measurement chain (2 or 4 mm measurement range, right-angle (90°) mount sensor)	: Refer to corresponding data sheet

Meggitt (Meggitt PLC) is a leading international engineering company, headquartered in England, that designs and delivers high-performance components and subsystems for aerospace, defence and selected energy markets. Meggitt comprises four customer-aligned divisions: Airframe Systems, Engine Systems, Energy & Equipment and Services & Support.

The Energy & Equipment division includes the Energy Sensing and Controls product group that specialises in sensing and monitoring solutions for a broad range of energy infrastructure, and control valves for industrial gas turbines, primarily for the Power Generation, Oil & Gas and Services markets. Energy & Equipment is headquartered in Switzerland (Meggitt SA) and incorporates the vibro-meter® product line, which has over 65 years of sensor and systems expertise and is trusted by original equipment manufacturers (OEMs) globally.

In this publication, a dot (.) is used as the decimal separator and thousands are separated by thin spaces. Example: 12345.67890.

Sales offices

Meggitt has offices in more than 30 countries. For a complete list, please visit our website.
